

References

- (1) For information on lattice ordered monoids:
P. Jipsen & C. Tsinakis, "A Survey of Residuated Lattices", Monograph: Developments in Mathematics, 2002.
- (2) For information on topology & topological ring:
little background is needed - a Google search should suffice.
- (3) An important text is:
J.S. Golan "Linear topologies on a ring: an overview", Pitman Research Notes in Math. #159, 1987.
- (Golan has written a number of books on Torsion Theory - these should be useful for background reading.)
- Other useful texts on Torsion Theory are:
- (4) B. Stenström, "Rings of Quotients", Springer-Verlag, #217, 1975;
- (5) L. Bican, T. Kepka, P. Nemeč, "Rings, Modules and Pre-radicals", Marcel Dekker, 1982.

Contributors past & present (with apologies to those overlooked):

(In no particular order):

- P. Gabriel (His PhD thesis titled "Des catégories abéliennes" in 1962 marked the subject's genesis.)
- J. Beachy
- P. Bland
- M. Teplya
- F. Raggi
- J. Ríos
- J.C. Pérez
- J.E & A.M. Vida-Prioli
- H. Simmonds
- R. Wisbauer
